Announcement of publication: The “Aftersales Way 2nd Edition”

Dear esteemed business partners,

We would like to express our sincere appreciation for your continued cooperation in our vehicle sales and aftersales activities. We are pleased to inform you that we have partially revised the “Aftersales Way,” which outlines Isuzu’s principles for aftersales operations as well as the expected roles for our distributors.

The main points of this revision are as follows:

- **Enhanced alignment with the Aftersales Awards assessment items**
  - Content related to periodic maintenance newly introduced in the Aftersales Awards 2025 has been updated.
- **Addition of the “Repair Support System”**
  - The role of distributors has been expanded to include the establishment of a repair support system that provides technical and operational support to dealers.

In addition to the above, several minor revisions have been made, including wording updates. For details of the revisions, please refer to the Old-New Comparison Table from the related links shown below.

For your reference, the introductory video shared at the time of the first edition of the Aftersales Way is also included in the related links. Please feel free to refer to it for an overview.
