UMI

Attendees

- Sarah Uzan – Director – UMI
- Yaniv Nissim – Inventory manager - UMI
- Hadewijch Tibos – Sales manager – ISZE
- Jérôme Van Der Pluym – Assistant manager/pricing analyst – ISZE
- Bart Symons – Strategic business developer – ISZE

Wide Container Supply and Logistics Challenges

- Ongoing issues with the availability of white containers for lubricant transport.
- The problem is widespread, affected by traffic and import restrictions from Belgium, Turkey, Italy, but not the United States.
- Shipments are being split into two containers, doubling shipping costs; this is due to the forwarder's inability to provide the required containers.
- ISZE & UMI are actively working to resolve the issue and will reassess in a few weeks via email.

Competitive Parts Share and Sample Requests

- Significant drop in competitive parts share: from 6–7% last year to 3,41% in the last three months.
- Misunderstandings about sample requests clarified: the request was for BVP examples of items, not physical samples.
- No change in procurement policy; preference remains for BVP and original parts, especially with Isuzu discounts.
- ISZE will provide a detailed breakdown of competitive parts data by partner/group for review.

Distributor KPI's and Data Reporting

- ISZE management requires monthly KPI's from all distributors; UMI has not submitted recent reports.
- Nadav is responsible for collecting and sending KPI data; some items cannot be provided due to system differences or internal policies.
- Sarah will coordinate with Nadav to refresh the request and clarify which items can be shared.

Business Planning and Market Information Requests

- ISZE announced upcoming business plan preparation for the next year.

- ISZE may reach out to UMI for market information to support planning.

D Max Orders and Market Outlook

- Over 1.000 D Max vehicles have been ordered and are awaiting delivery, with strong demand for the classic model.
- The electric version is not expected to perform well in Israel due to range limitations.

Follow-up Tasks

- Continue working to resolve wide container supply issues (Sarah).
- Wait a few weeks before proceeding with open lubricant orders and follow up via email (Jerome).
- Refresh KPI reporting request and provide all possible data to Jerome, clarifying any limitations (Sarah).
- Send a breakdown of competitive parts purchased to clarify the drop in share (Jerome).
- Provide market information for business plan development when requested (Sarah).
