ISUZU UNIVERSE · DISTRIBUTOR REVIEW

Denmark

Prepared for a working conversation with Denmark, calendar 2025 against 2024 unless stated. Figures are Denmark's own; every comparison is against its own history or an anonymised network aggregate.

Parts billed by Isuzu to you

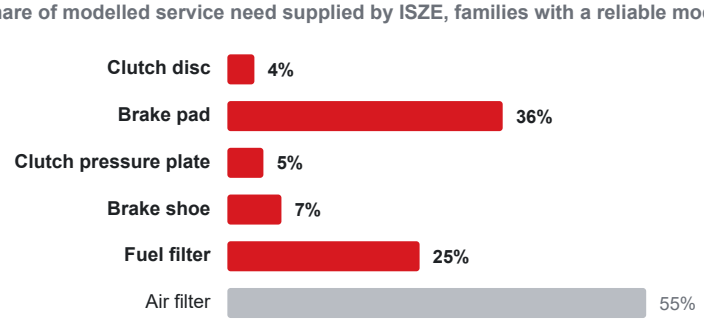

Parts billed, down 16.4% year on year. Source: ISZE billing records, calendar 2024 and 2025.

What we can see of your own dealer network

We hold **no sales-to-dealer data** from you for 2025. We see what we bill to you; what you sell on to each dealer is not visible to us. Across the network, 6 of 22 distributors sent any sales-to-dealer data for 2025; you are not one of them.

> This is the same blindness ISZE has about you that you may have about your own dealers: we see what is billed, not what is sold on or serviced.

Maintenance parts supplied against modelled need

Capped at 100% by construction; capture above 100% is withheld as unreliable, not shown as a figure. Source: maintenance-parts revenue-capture model, calendar 2025.

Weighted across the 13 reliable families, supply covers **23%** of modelled need.

1 families (Brake rotor) are not shown: the model's expected demand is exceeded by what was actually supplied, which means the model is not reliable for those families in your market. We do not show a figure above 100%.

Genuine and Best Value

Share of maintenance-parts billing, Genuine (red) against Best Value (grey). Source: maintenance-parts pricing analysis, calendar 2024 and 2025.

In 2025, €21,770 Genuine and €3,284 Best Value (€25k together across 9 product lines with a reference price).

Spread of parts purchases across your dealers

We cannot show this: we do not hold named-dealer sales data for you for 2025 (see above). Without it, a ranked spread across your dealers cannot be built — showing one would mean estimating a per-dealer figure from a national total, which this review deliberately does not do.

Isuzu Dealer Standards

20 dealer records are listed for your network in the Isuzu Dealer Standards assessment, of which **19** carry a recorded self-assessment score. The remainder are listed without a score, which means the assessment was never carried out for them — not that they scored zero.

What would you need to judge each of your dealers?

Figures: ISZE parts billing, maintenance-parts pricing and revenue-capture records, sales-to-dealer submissions and the Isuzu Dealer Standards network lists, all as held by ISZE as of September 2026. Anchors: the ISZE data-quality sign-off, then the headline-metrics file, then the single facts sheet. Prepared for Denmark only; no other distributor is named on this page.
