Introduction

In order to maximize customer uptime, we need to ensure that they use the right products not only for the parts but also for lubricants.

With the worldwide trend toward higher EURO emission regulation, we need to use the “Right lubricants”* more than ever.

Therefore, in addition to the genuine parts, Isuzu will focus on enhancing the environment that makes it easier for you to purchase and supply the right lubricants.

*”Right lubricants” means Genuine lubricants(BESCO) and recommended lubricants written in the owner’s Manual/Maintenance Manual.

Mentimeter

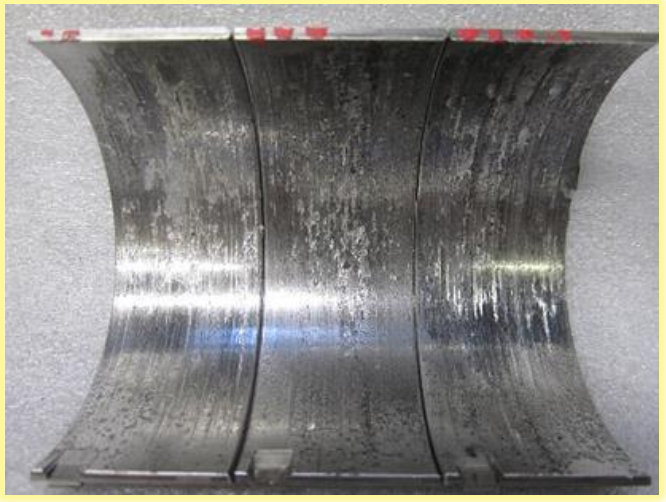

Question: What lubricants do you supply to your customers ?
お客様にどのような油脂を供給していますか？

Answer: [1] Lubricants in Owner’s/Maintenance manual
[2] Others
[3] Not sure
[4] Not supplied

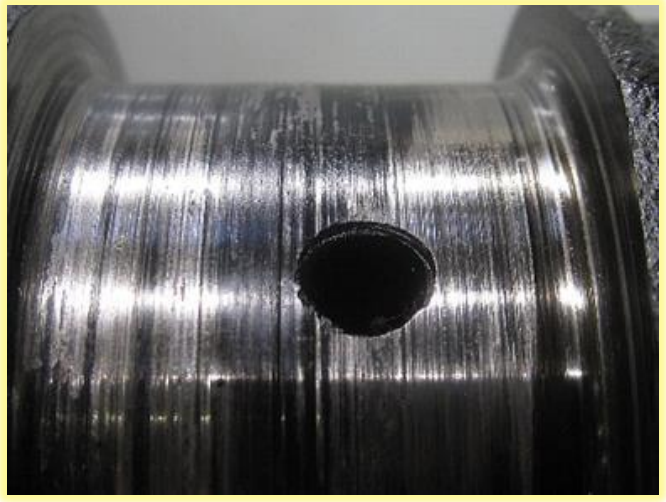

Defect case: Crankshaft metal corrosion and wear

☐ Problems with inappropriate lubricants

Since crankshaft metal is a non-iron metal, it's sensitive to corrosion and wear than iron, and it causes friction with crankshaft and leads to engine seizing in the worst case.

Crankshaft Metal

Crankshaft

Occur corrosion and wear on the metal

↓

Cause friction with crankshaft

↓

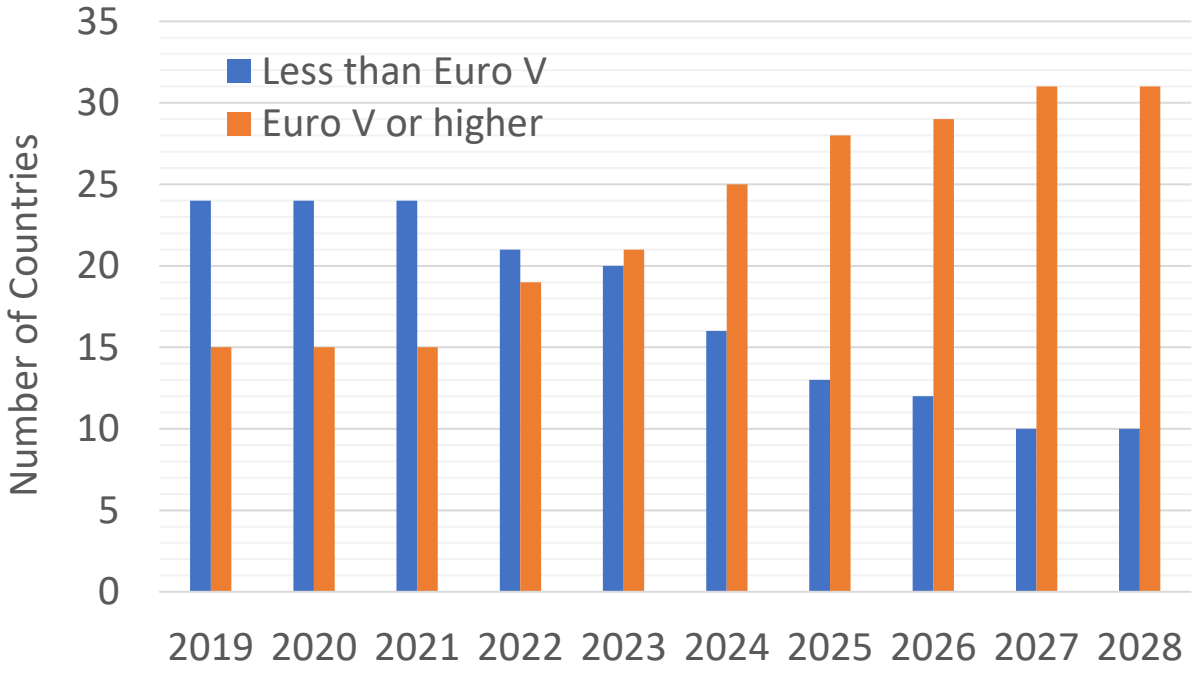

Engine seizing

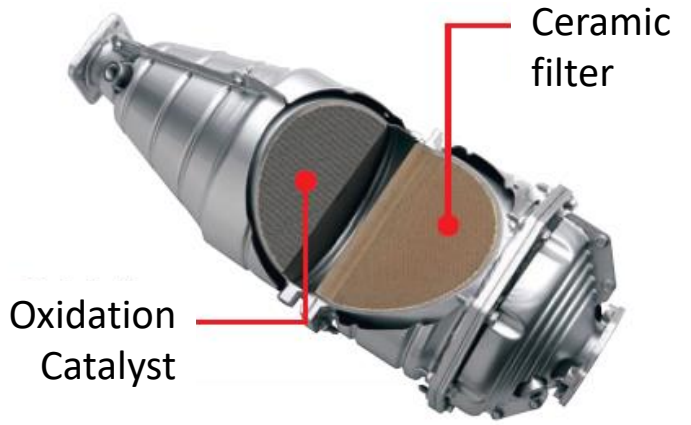

☐ Advantage of right lubricants

The right lubricants appropriately contain anti corrosion-wear additives, and it can protect these parts from wear.

Trend of Global Emission Regulation

In recent years, the number of countries introduce Euro V or higher emission regulation has increased. ISUZU introduced DPD device to comply with the regulations.

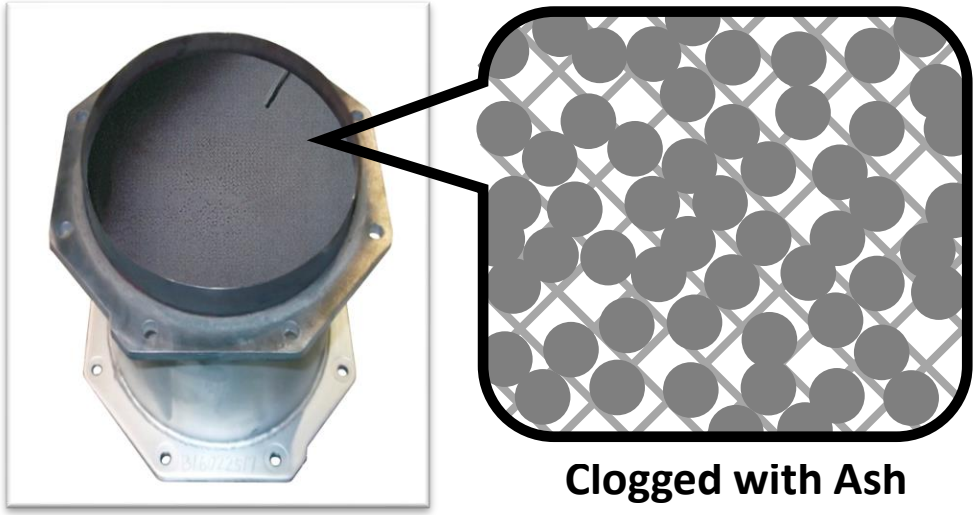

DPD: Deisel Particulate Diffuser

The use of right engine oil(Low ash content) for DPD is required.

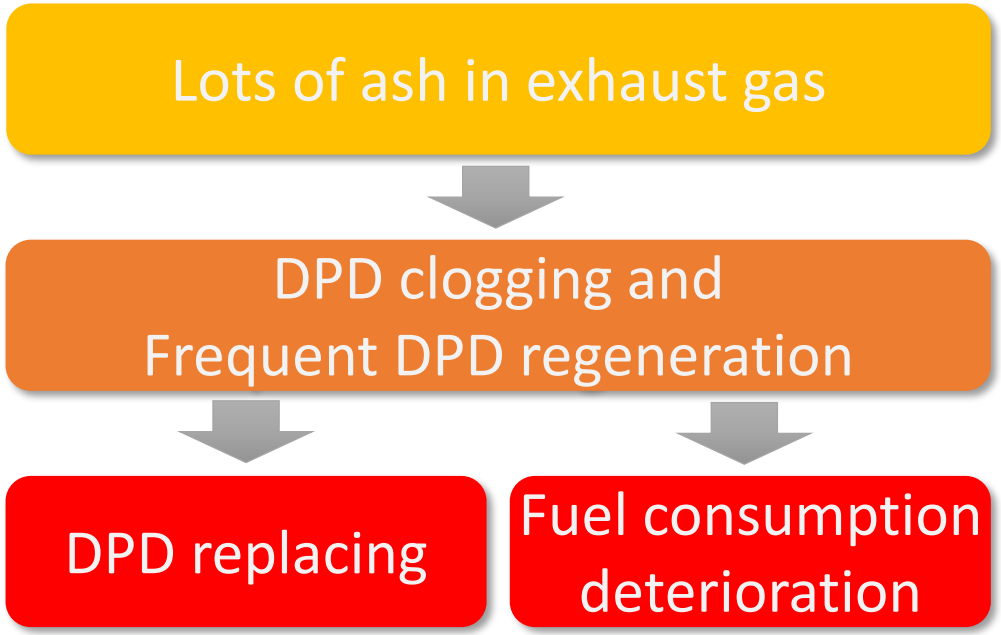

Defect case: DPD clogging

☐ Problems with inappropriate lubricants (Engine Oil)

DPD clogging is caused by using inappropriate engine oil which contains a lot of ash, and it leads to vehicle downtime and deterioration of fuel consumption.

Clogged with Ash

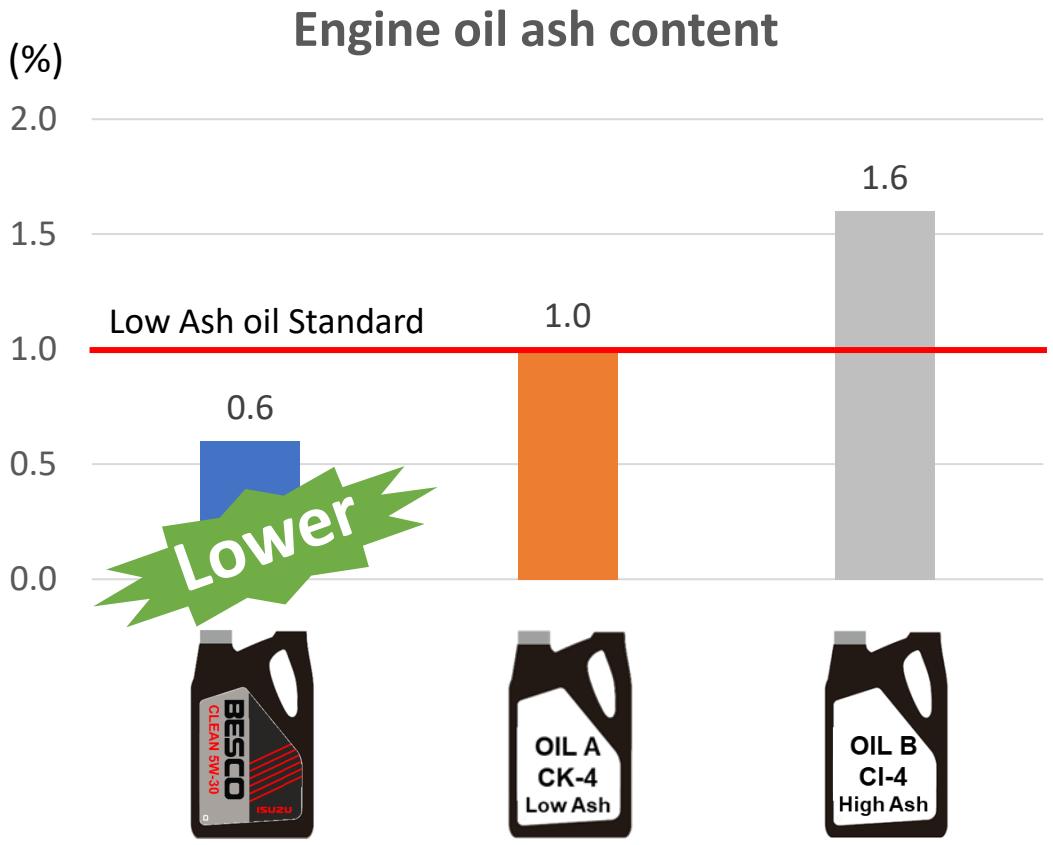

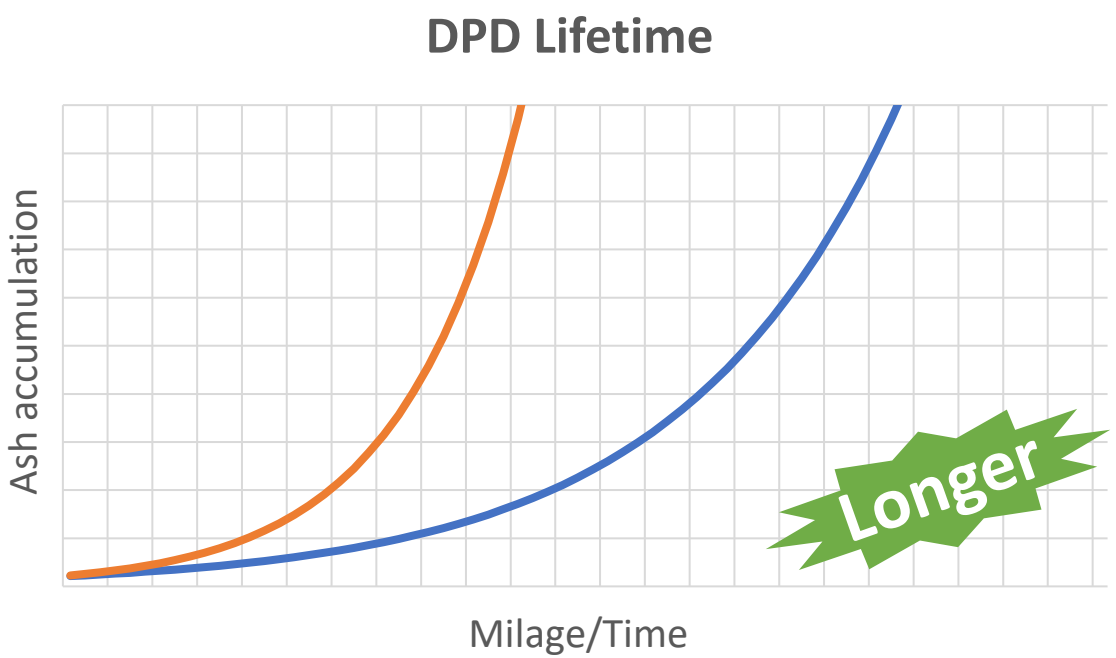

☐ Advantage of right lubricants

The right Engine oil for high Euro Models has low ash content to adapt DPD.
Therefore, clogging can be reduced.

Advantage of ISUZU BESCO CLEAN Engine oil

The ash content of ISUZU BESCO CLEAN Engine Oil is much lower than aftermarket products for high-euro emission regulation, and the life of DPD can be nearly two times.

Please offer BESCO CLEAN Engine oil for maximizing customer uptime!

To maximize customers uptime

ISUZU requests you to…

1 Check whether customers are using the right lubricants.

2 Offer repair and maintenance with right lubricants if customers use lubricants which are not in the owner's manual/maintenance manual.

3 Supply ISUZU BESCO products or set up ISUZU branded lubricants with us when you supply to customers.
By doing that it becomes obvious to customers that ISUZU has confirmed the quality of them.

What ISUZU support

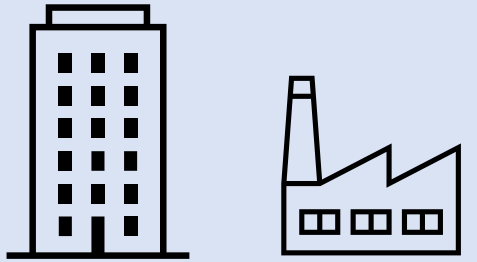

ISUZU is here to support you face these challenges to supply right lubricants.

Challenges (Examples)	ISUZU Support	
	Local Purchasing	Centralized Purchasing
Price Competitiveness ➢ Purchasing Cost ➢ Differentiation by Branding	✓	✓
Logistics Challenges ➢ Import restriction ➢ Handling Dangerous Goods ➢ Inventory Reduction	✓	

*Centralized purchasing is currently under study. We need your cooperation to advance that.

Price Competitiveness

- Reduce purchasing costs by switch sourcing from Japan to local.

Logistics challenges

- Eliminate the need to handle oil import regulations by local purchasing.
- Eliminate the need for handling dangerous goods and keeping lubricants stock by using lubricant supplier's distribution network instead of yours.
