

■ System Diagram/Alert mode

Information detected by the radar is processed by the ECU and transmitted to the pillar LEDs and speakers Cyclist and pedestrians in a specific area and lights up the pillar LED and alert.

Blind Spot Information Systems (BSIS)

- **Purpose:** Reduce turn- and pull-away risk to cyclists and pedestrians.
- **Rationale:** Mirrors alone do not cover large side blind spots.
- **EU scope:** Primarily N2 and N3 heavy goods vehicles and certain buses (M2 and M3).
- **Requirements:** Technical requirements are defined in UN ECE Regulation No. 151 and incorporated into EU law through the General Safety Regulation.
- **Legal & timing:** Regulation (EU) 2019/2144: mandatory for new vehicle types from 6 July 2022 and for all new vehicle registrations from 7 July 2024.
