UK: Market share by Brand

- After the new year, registrations are low due to the increased ZEV Mandate requirements
- Additionally, the BIK tax change is now taking effect, which is further decreasing the numbers, taking the YTD market volume to an all-time low

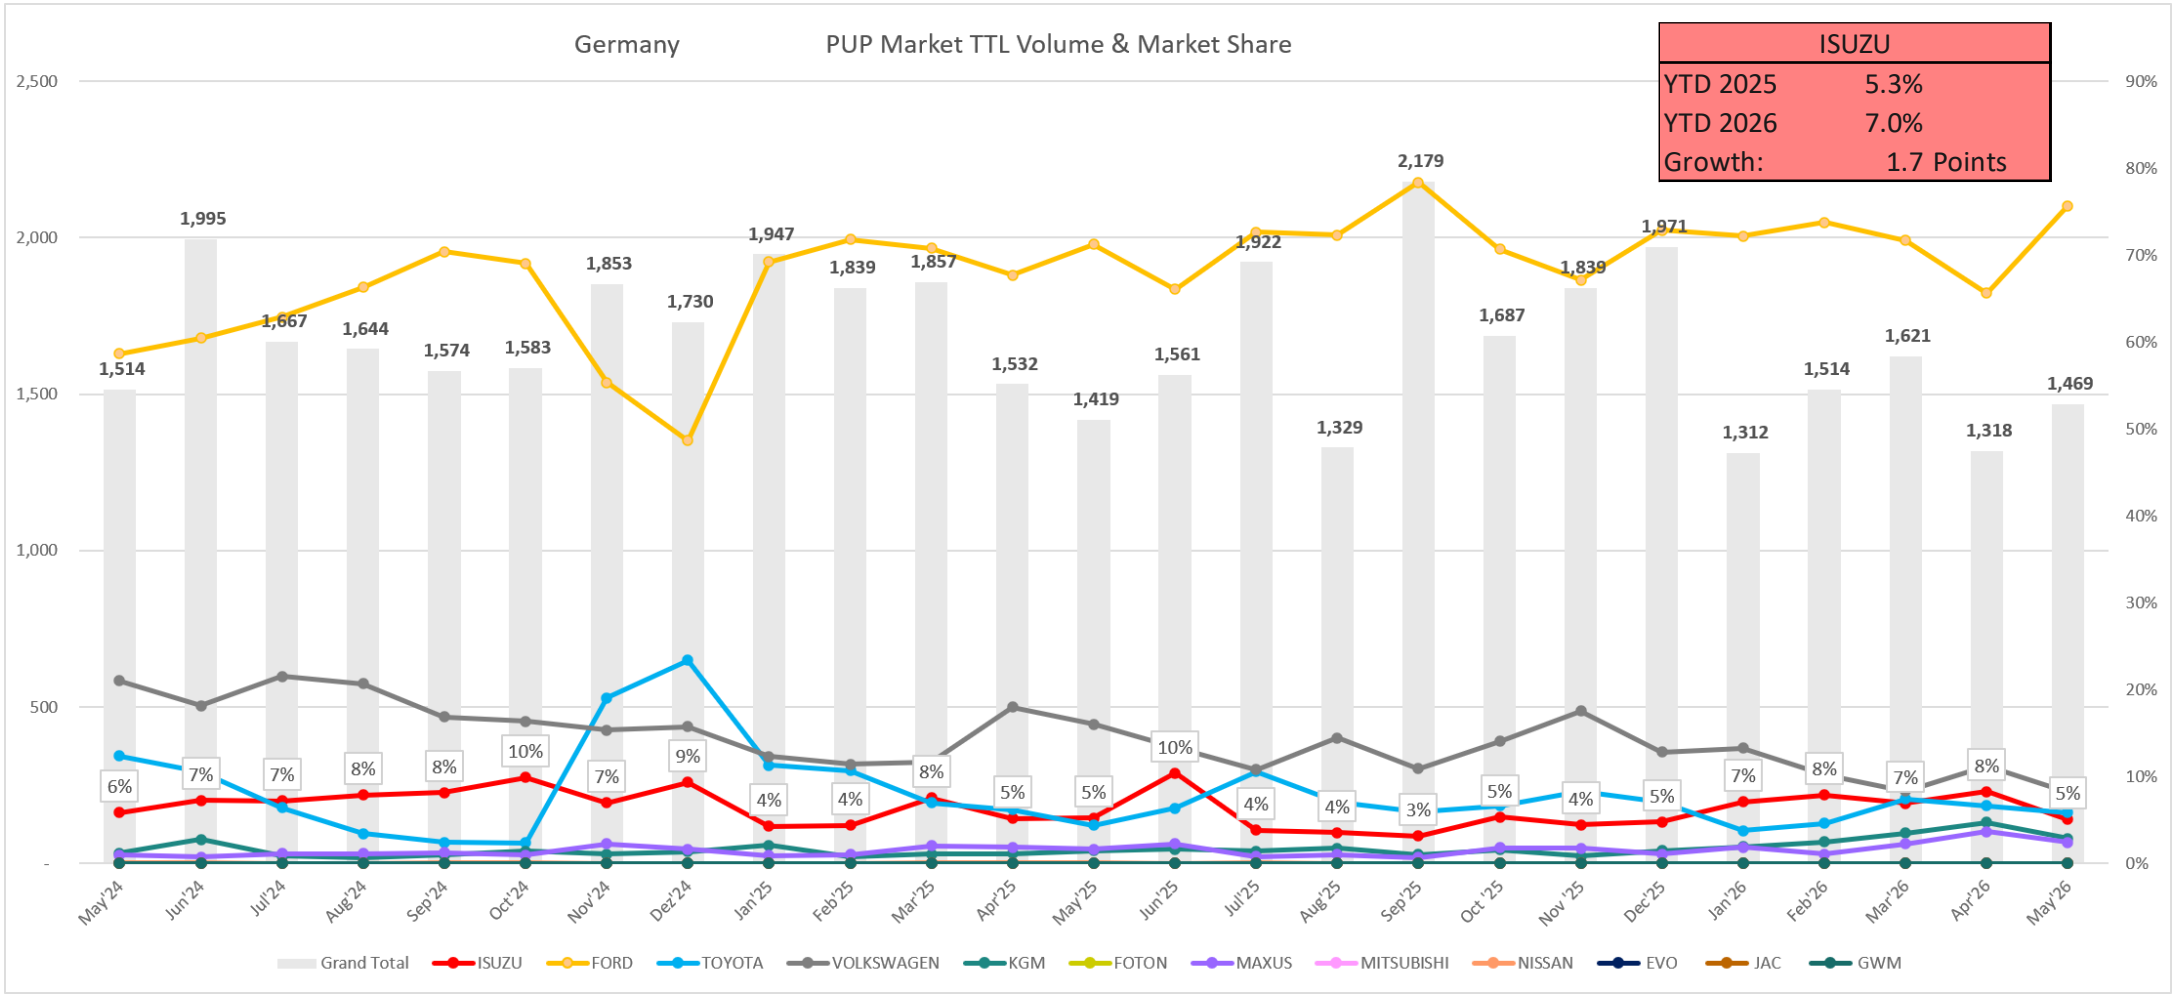

FRANCE: Sales and Share by Brand

*Data from JATO

- Ford still a comparably low market share – all three competitors now in a similar range, with Toyota taking over the market lead again by a slight margin

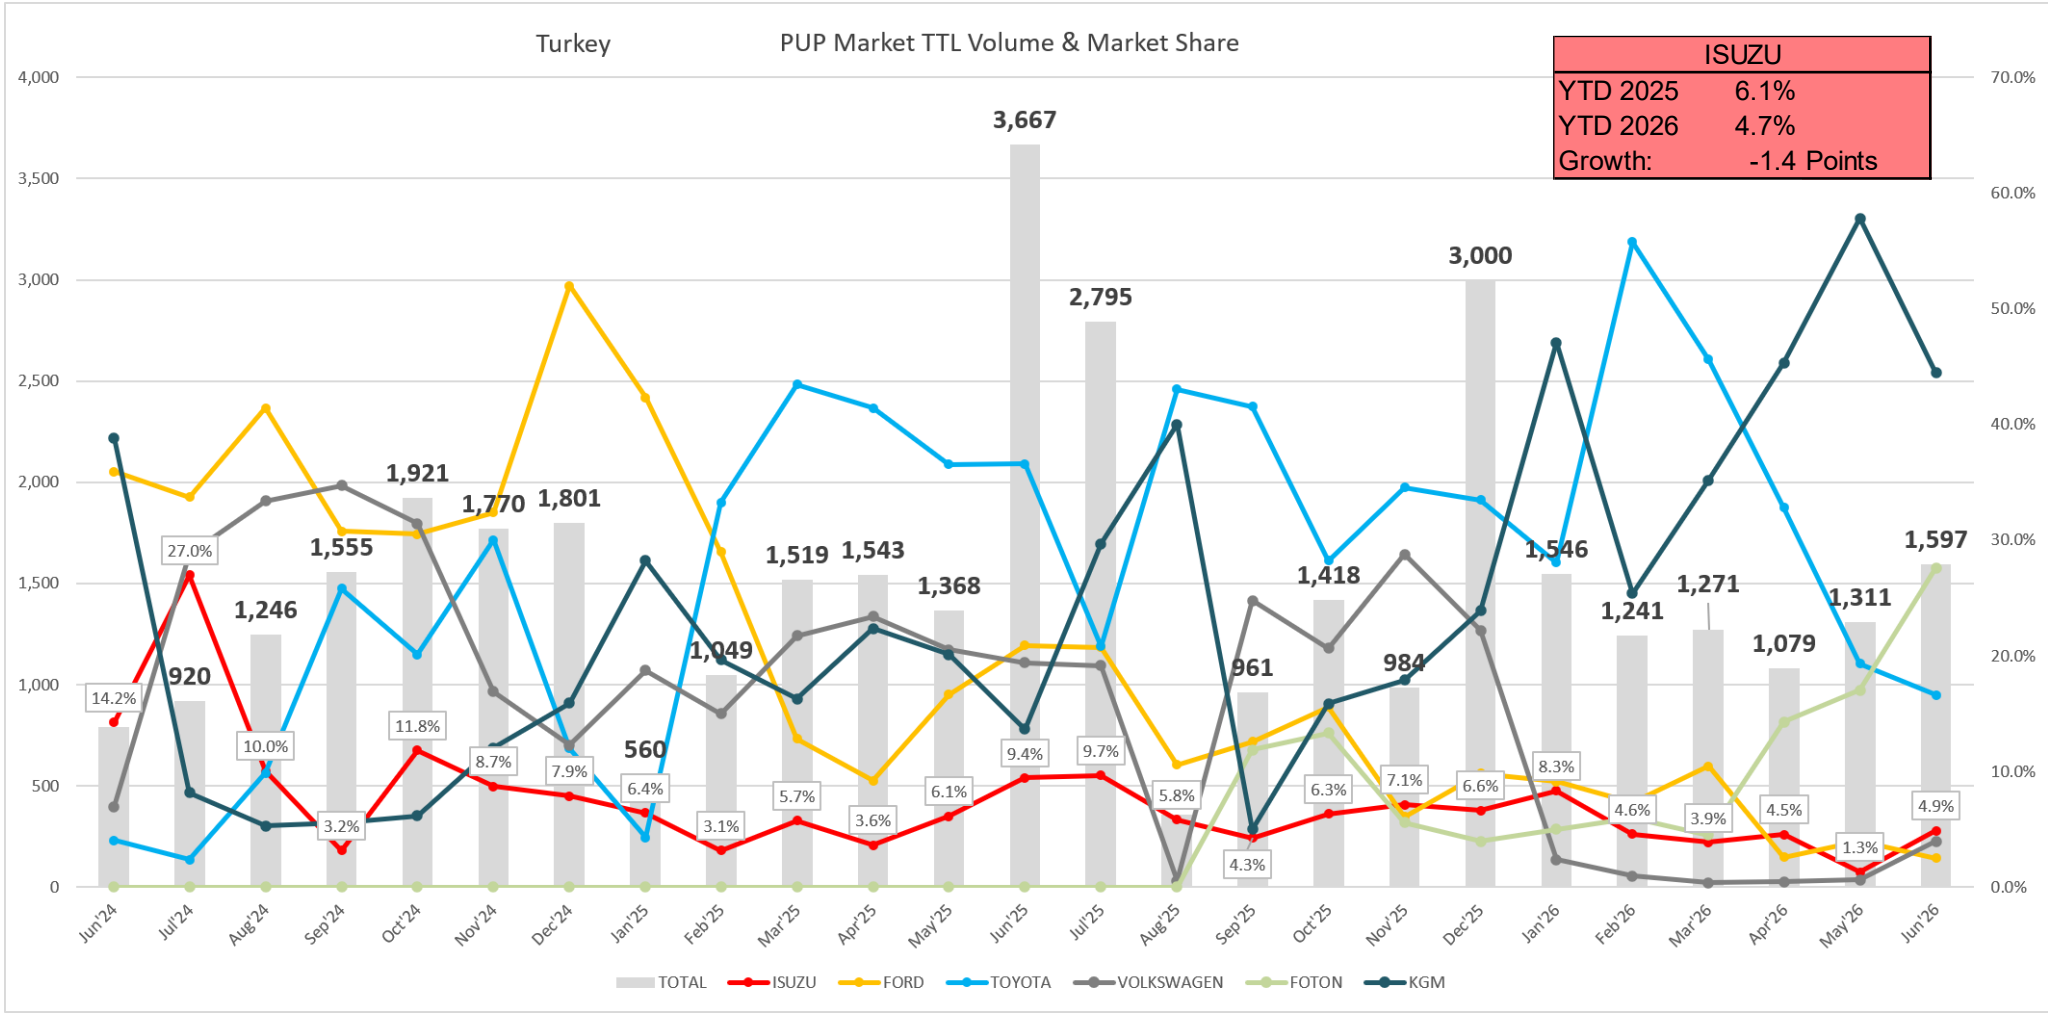

GERMANY: Sales and Share by Brand

*Data from JATO

- The total market in May increased again compared to April, mainly due to the recovery of Ford. Small businesses are still affected by a weakened economy in Germany, keeping the overall volume slightly lower than 2025.
- Isuzu's registrations still show upward trend comparing to 2025, YTD reached a market share of 7%

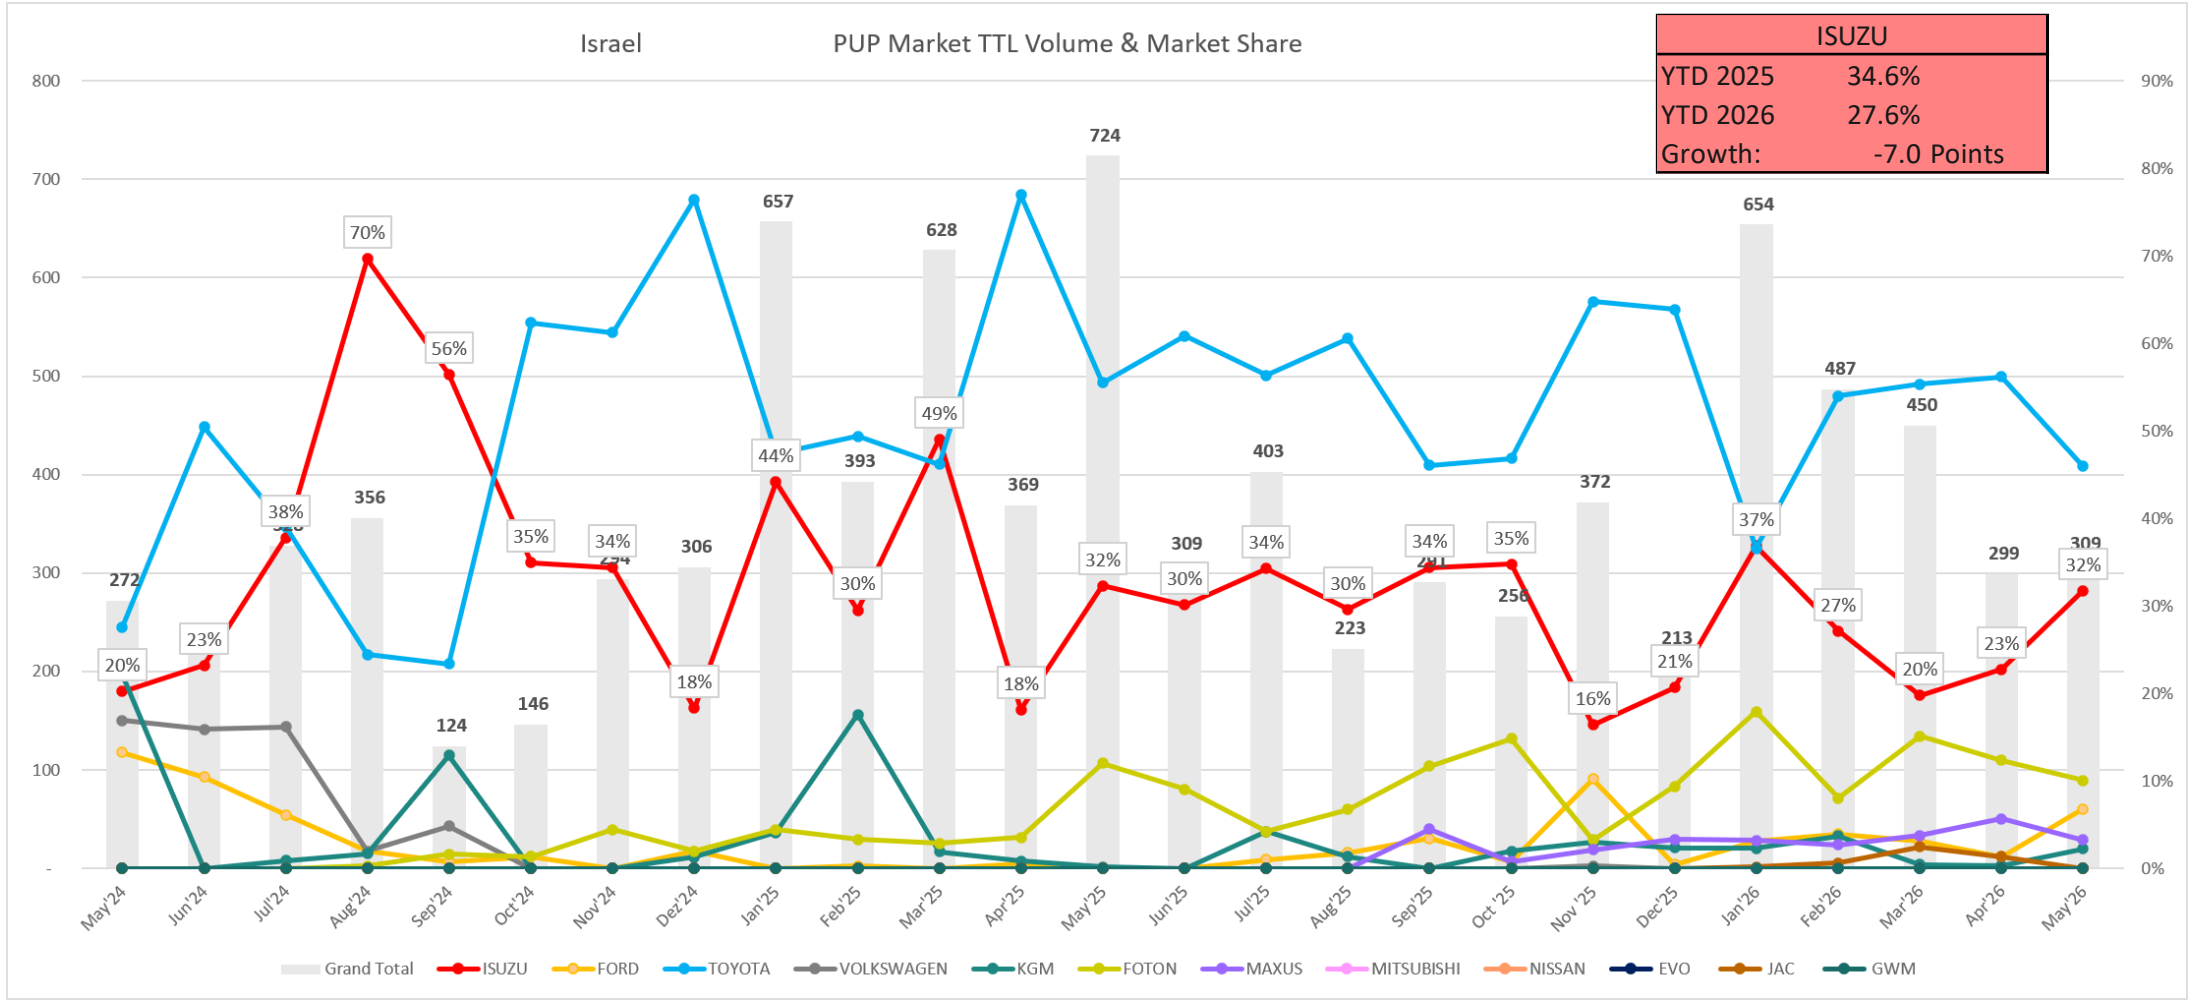

TURKEY: Sales and Share by Brand

*Data from distributor

- KGM likely dropping due to their sales campaign ending at the end of May, but they are still very strong.
- Toyota still offer 10% discount on webpage and selling out old model. New Model is announced already

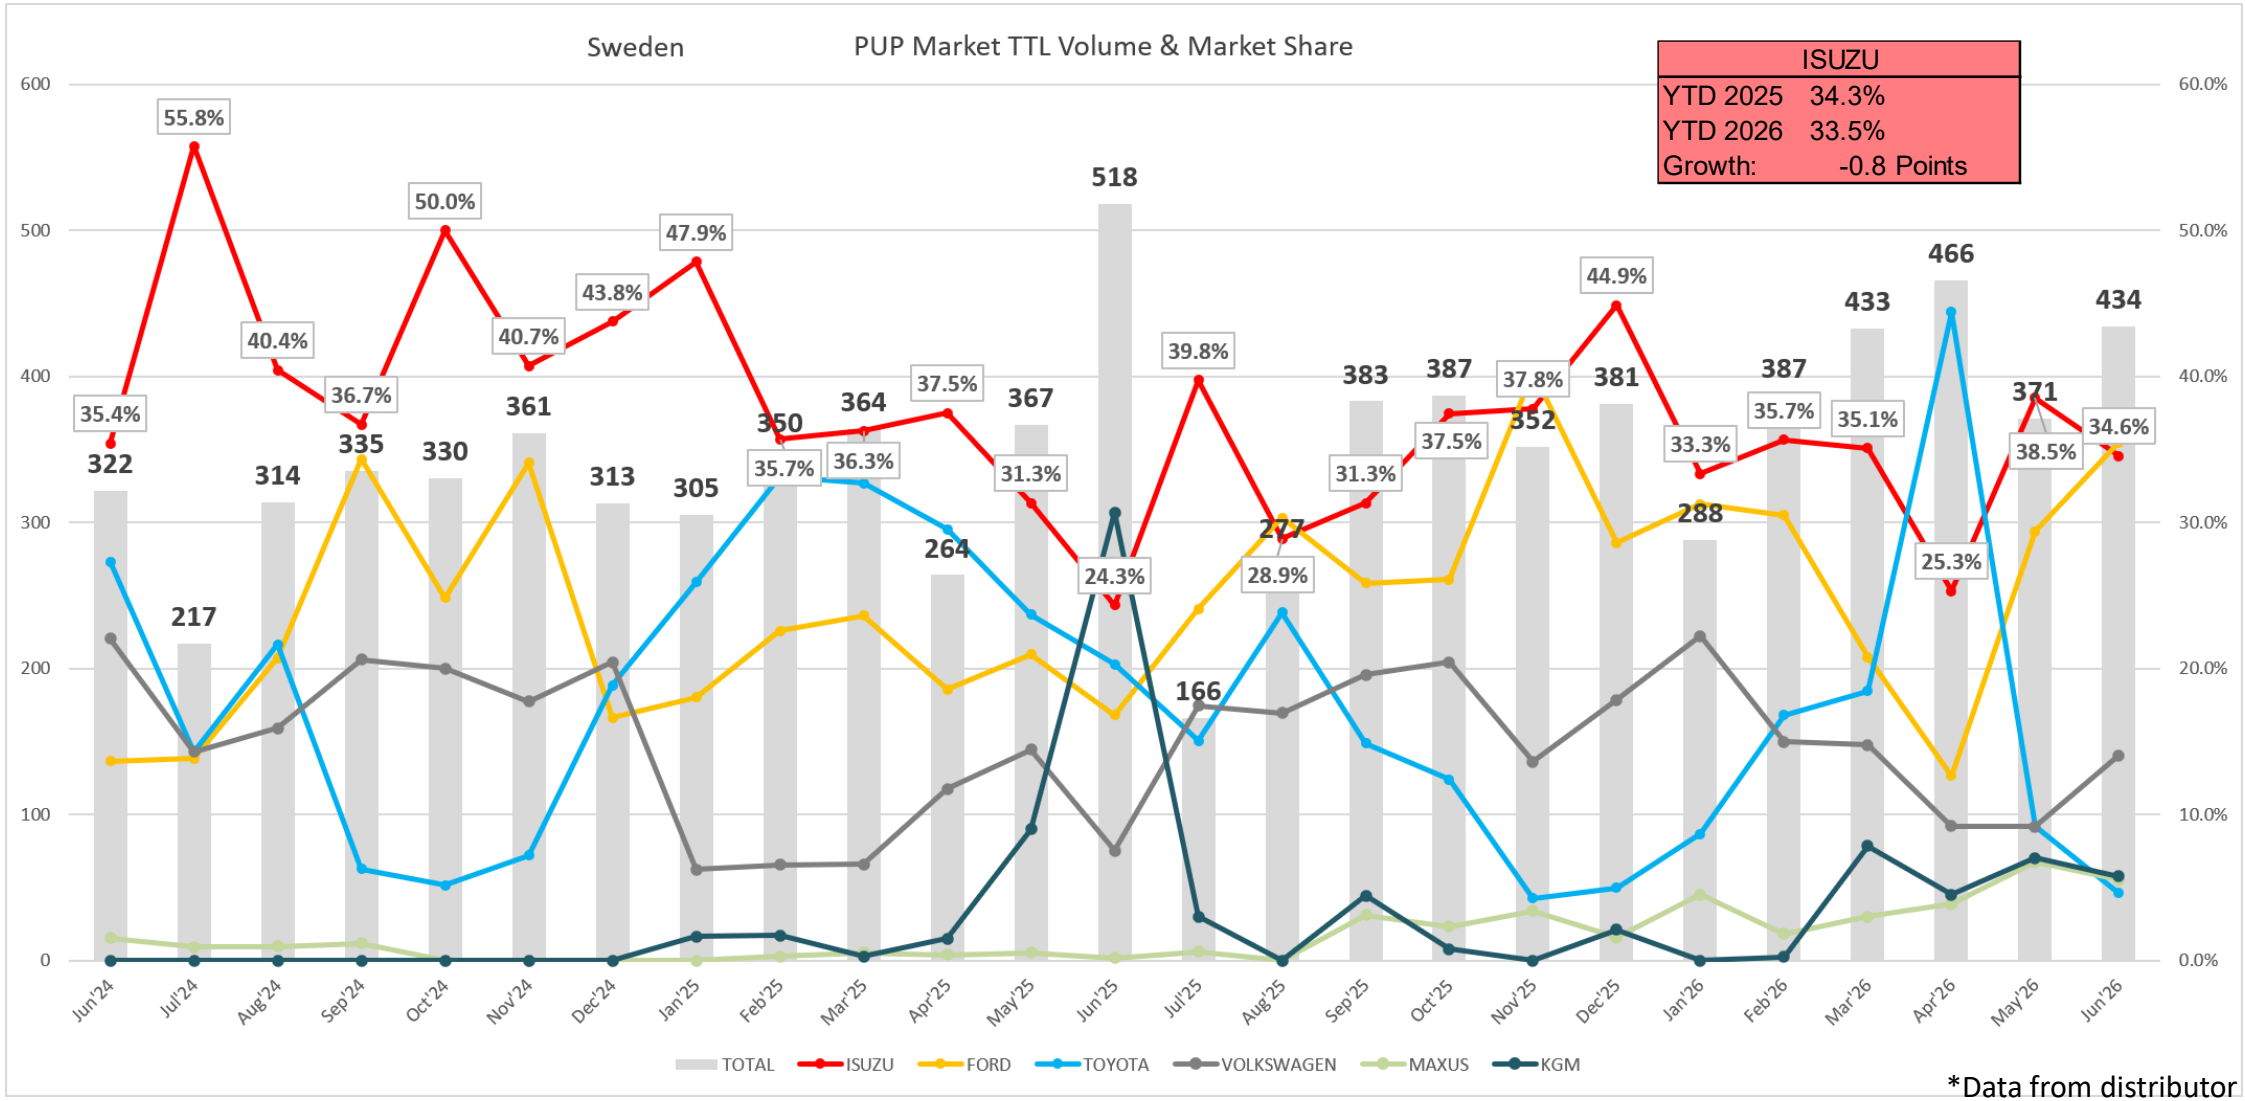

ISRAEL: Sales and Share by Brand

*Data from JATO

- May volume very similarly low to April after start of war in March.
- Government budget for 2026 still not fixed and UMI is waiting for official order from the government – they need to sell some part of their stock to other customers
- UMI feels more and more threatened by competition of Chinese brands which offer low prices.

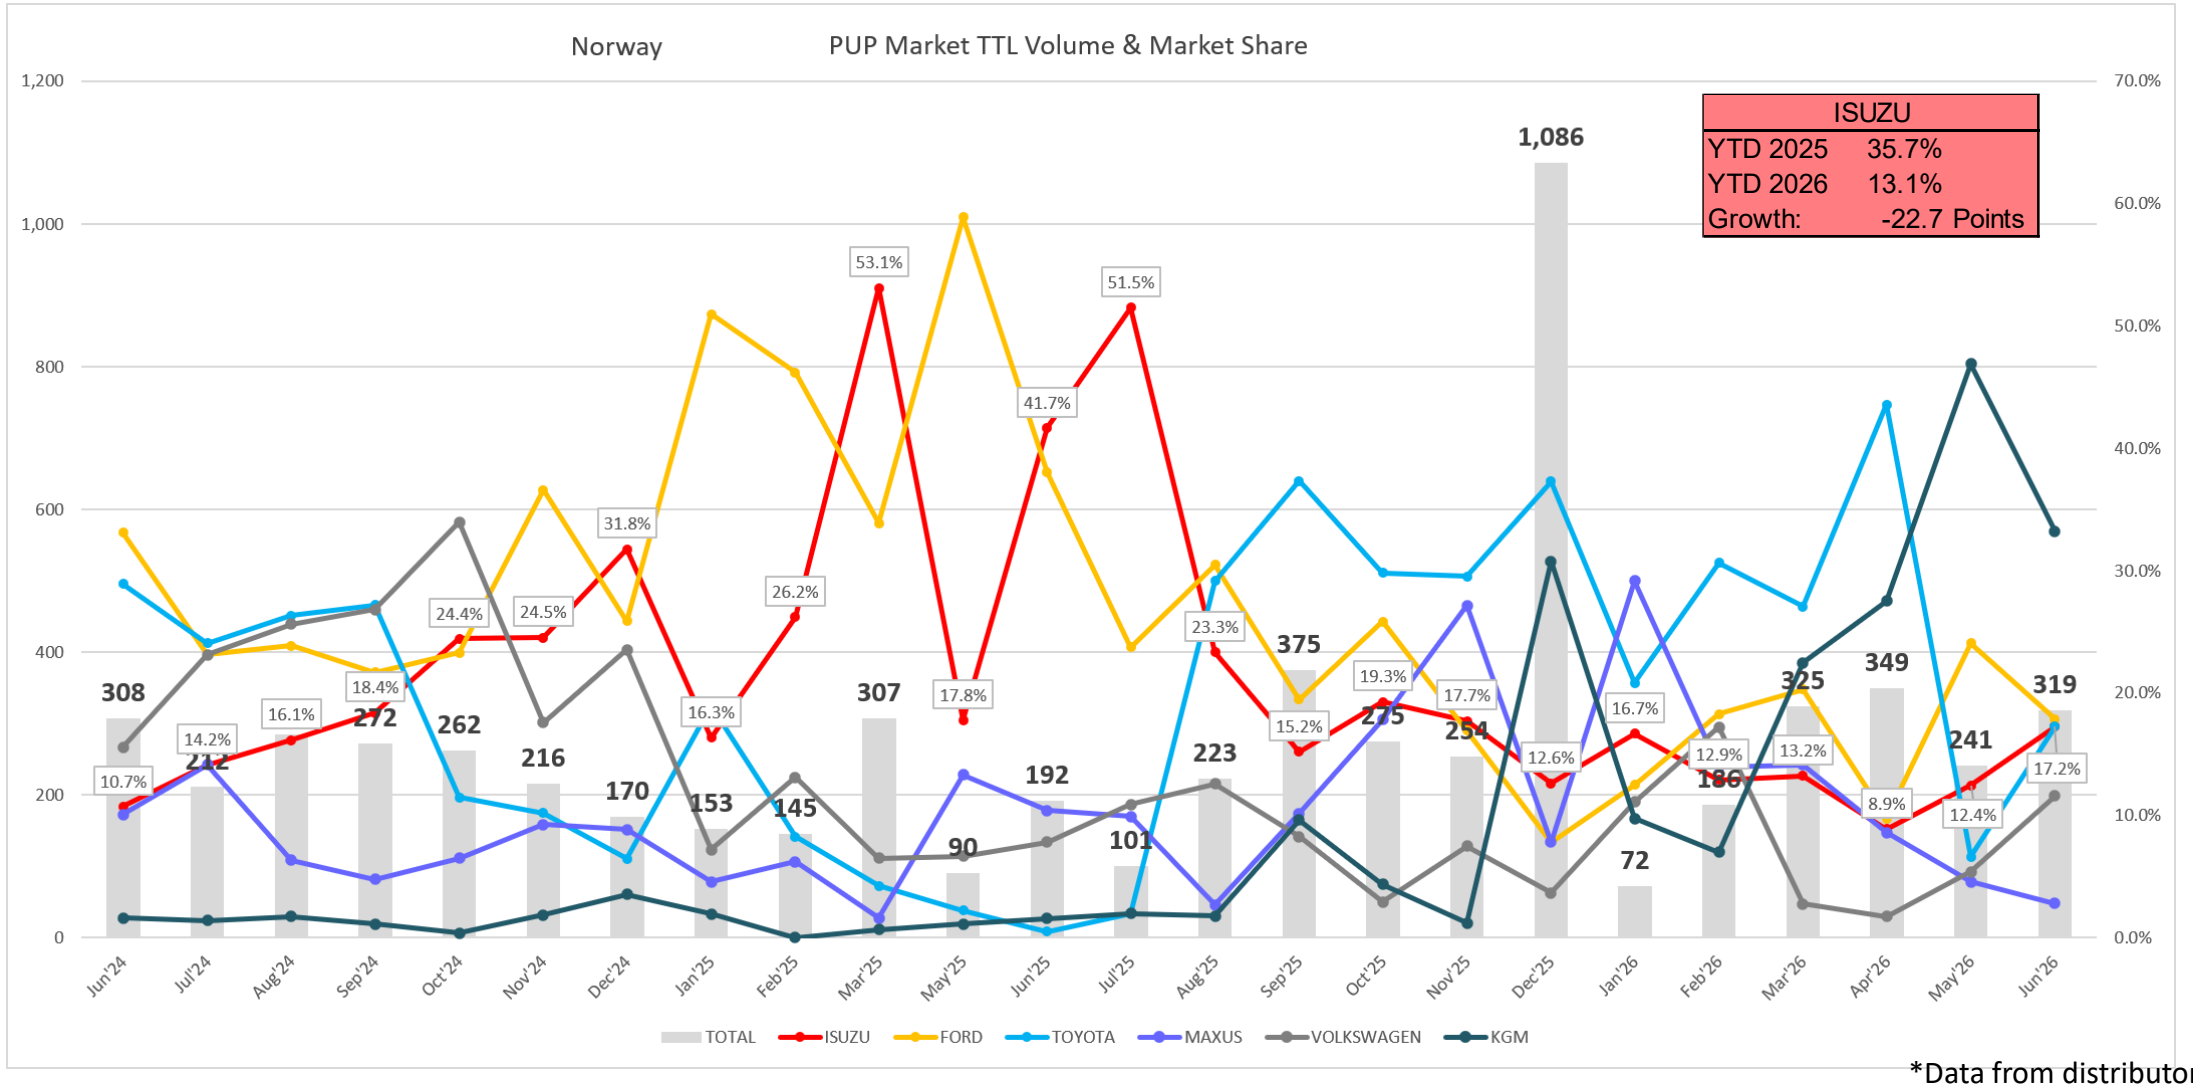

SWEDEN: Sales and Share by Brand

*Data from distributor

- After the peak of Toyota in April (grey import from some other European countries), they dropped again to a low share and will probably stay that way until the new model arrives at the end of summer
- Isuzu lost their number 1 position by a slight margin to Ford, but is still no. 1 YTD

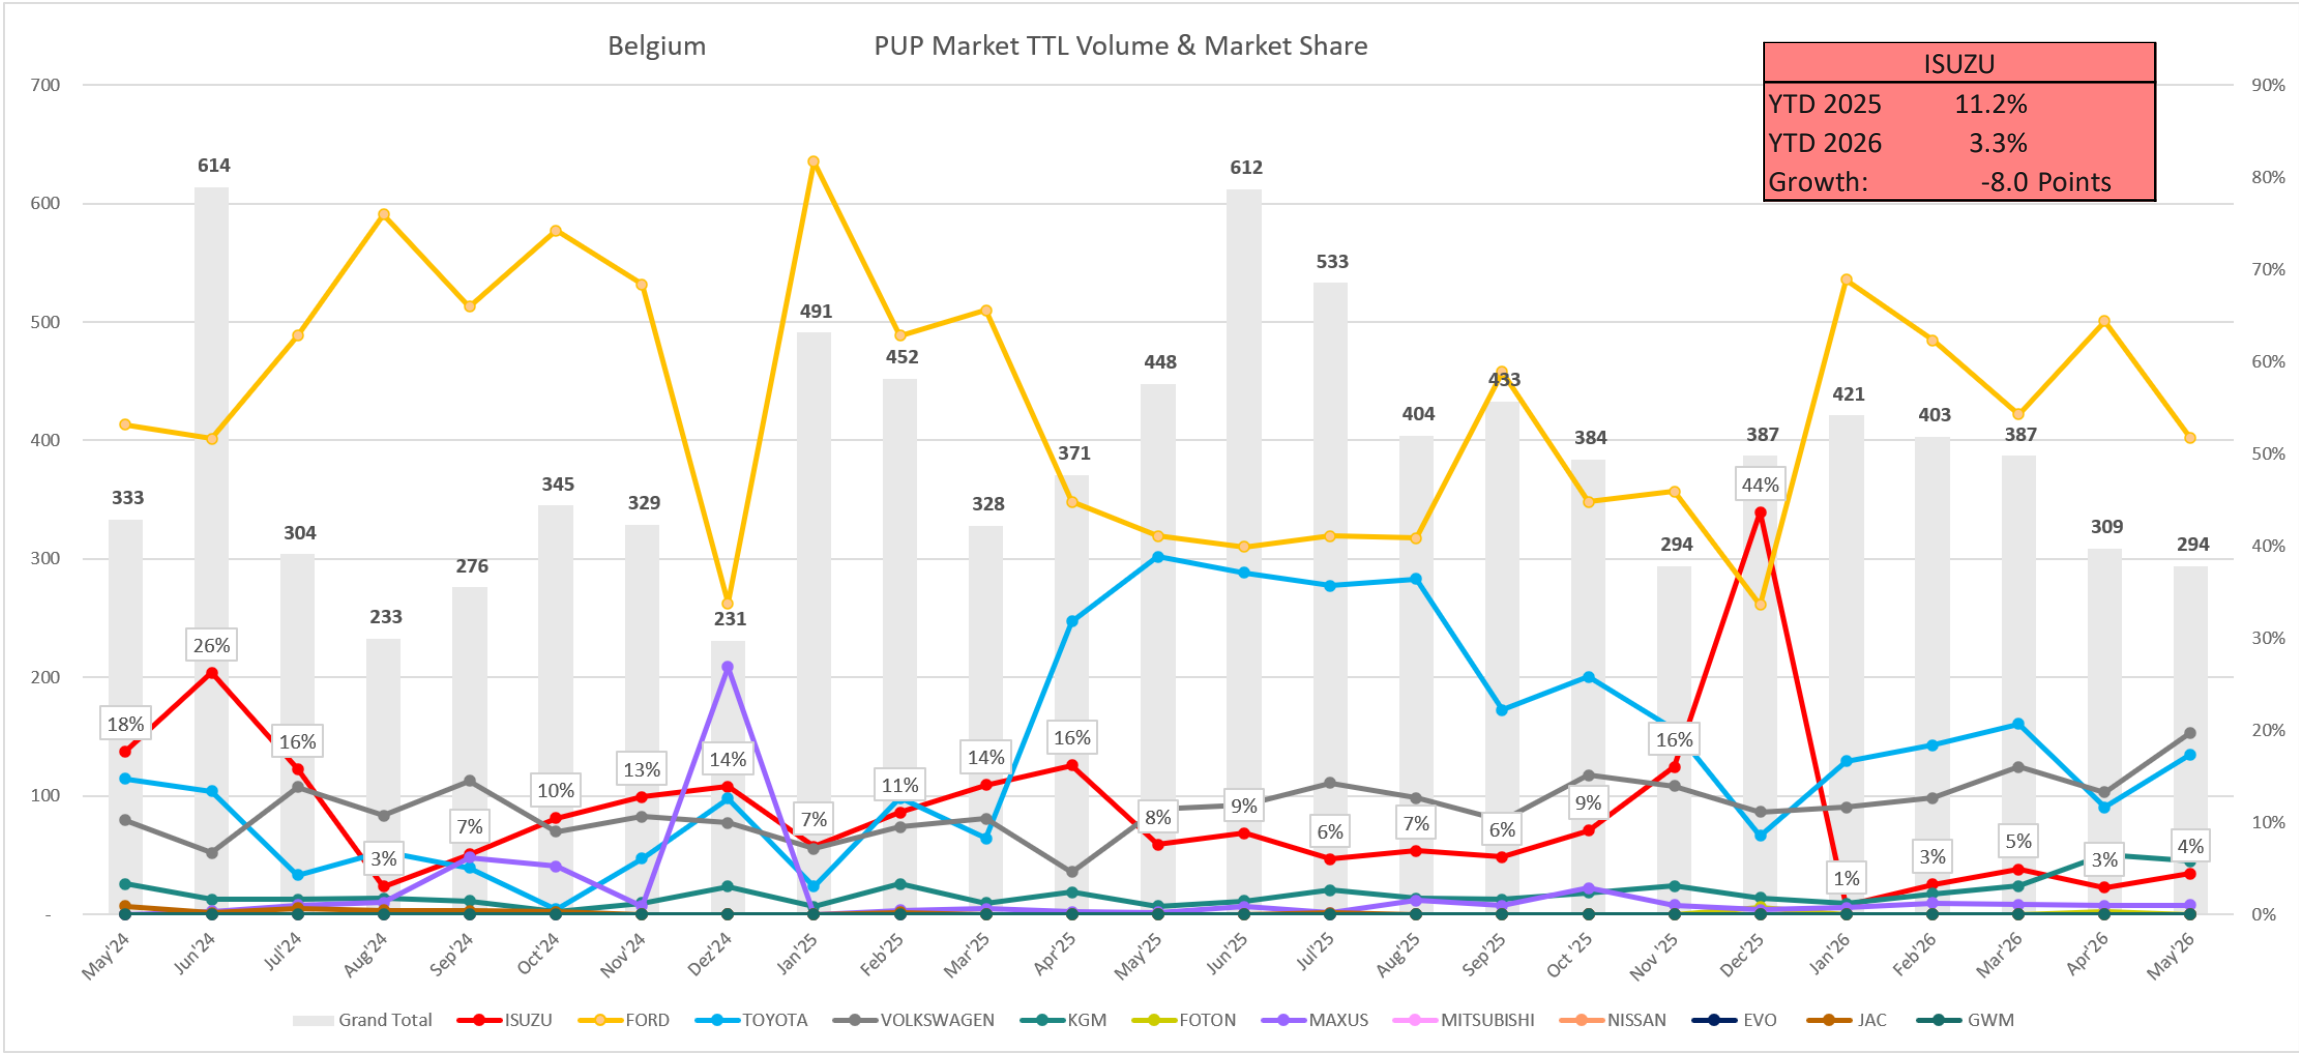

NORWAY: Sales and Share by Brand

*Data from distributor

- KGM still on the rise with a very good EV price, especially with 4x2 model. It is Popular with customers who actually prefer SUV and not traditional PUP customers. Therefore, the market seems to expend but demand for ICE is heavily shrinking as many construction companies are going bankrupt.
- Toyota selling out old model as they expect their new model to arrive in Q3

BELGIUM: Sales and Share by Brand

*Data from JATO

- Overall market is rapidly declining due to seasonality (high sales at the beginning of year and low during summer months)
- Isuzu share is still low because of some pre-registered stock

MIDI collaboration with Haribo during tour de France
