ISZE Warranty Analysis 2025

Network warranty performance — per-DB intensity, dominant failure modes, commercial cross-sell, and benchmarking framework

1. Headline numbers

Metric	Value	Context
Total warranty lines priced	11,365	2,388 CV + 8,977 LCV
Total warranty value at PR00	€2,894,644	Parts only — labour and other costs excluded
Network commercial parts sales 2025	€31,353,932	From ERP net-sales export, parts-only
Warranty as % of commercial parts sales	9.2%	Network average — see section 5 for benchmarking caveat
Parts replaced under warranty (units)	12,885	Across 16 reporting distributors
DBs absent from data	UMI (Israel LCV)	€3.4M of commercial sales but zero warranty rows — data gap

Warranty parts do not appear in the GPS sales TSV. Values are computed as warranty unit quantity × PR00 price (Pricing_Data master, 163,077 part numbers). The admit/claim amount in the warranty file itself is not used.

2. Per-DB warranty intensity

Sorted by warranty € per UIO unit. High €/UIO + high warranty/sales together = fleet-health flag.

DB	Country	UIO 2025	Warr qty	Warranty €	€/UIO	Sales 2025	Warr/Sales
Nordic Auto	Finland	1,204	184	€48,959	€40.66	€285,913	17.1%
RSA	Norway	7,929	1,083	€291,668	€36.79	€1,438,473	20.3%
ISD-Lang	Germany	12,855	932	€329,912	€25.66	€2,577,766	12.8%
UTI	Israel	11,253	766	€278,609	€24.76	€3,402,117	8.2%
IUK	United Kingdom	47,783	5,428	€1,058,812	€22.16	€6,221,920	17.0%
IBX	Belgium	9,594	712	€173,951	€18.13	€2,143,952	8.1%
Isuzu Rom Auto	Romania	1,071	60	€19,366	€18.08	€177,276	10.9%
GasanZammit	Malta	1,040	142	€18,645	€17.93	€206,502	9.0%
ITUK	United Kingdom	22,389	1,867	€398,438	€17.80	€5,769,868	6.9%
BL	Iceland	406	52	€7,047	€17.36	€87,260	8.1%
Imotors	Portugal	8,176	727	€139,082	€17.01	€1,712,791	8.1%
Petros Petropoulos	Greece	3,742	475	€56,435	€15.08	€528,391	10.7%
Loutsios & Sons	Cyprus	2,308	194	€28,188	€12.21	€429,512	6.6%
Isuzu Ireland	Ireland	3,056	206	€36,275	€11.87	€1,213,660	3.0%
Isuzu Denmark	Denmark	851	57	€9,257	€10.88	€150,218	6.2%
NETWORK		**133,657**	**12,885**	**€2,894,644**	**€21.66**	**€26,345,619**	**11.0%**

Observations. RSA Norway tops the network at €36.79/UIO and 20.3% warranty/sales — outlier. IUK at €22.16/UIO with 17.0% warranty/sales reflects the D-Max electrical reliability theme. Isuzu Ireland 3.0% — outlier low. UMI absent from this dataset.

3. Top 25 parts by warranty value

Three steering-unit PNs combine for €533k (18% of all warranty); two PM-sensor PNs combine for €407k.

#	Part number	Description	Qty	Warranty €
1	7552348290	STEERING UNIT	186	€369,000
2	8978808250	SENSOR; PM	1,270	€307,073
3	7552348280	STEERING UNIT	72	€142,839
4	8982878080	FILTER ASM	97	€109,578
5	8983528481	SENSOR; NOX	387	€99,978
6	8978808270	SENSOR; PM	412	€99,617
7	8983767550	ROTOR; DISC BRK,FRT	1,073	€85,046
8	8975293220	ENGINE ASM	4	€57,532
9	8972746690	TANK ASM; DEF	49	€53,146
10	7552752270	CONTROL UNIT	71	€49,167
11	8974985741	TURBOCHARGER ASM	52	€43,385
12	8984865441	PUMP; WATER	241	€42,226
13	8975077751	PUMP ASM; DEF,DCM SPLY	38	€40,831
14	8982688122	PUMP ASM; DEF,DCM SPLY	37	€39,757
15	8974807975	RADIO CONTROL ASM; STEREO,AM-F	77	€33,671
16	8984865960	RADIATOR ASM	181	€33,223
17	8983373180	SENSOR ASM; DEF TANK	97	€31,845
18	8976710960	ENGINE ASM	2	€28,164
19	8975452010	SENSOR ASM; DEF TANK	69	€26,120
20	8983842670	INJECTOR ASM; DEF DCM	158	€25,005
21	8975056801	PAD KIT; CALIPER,DISC BRK,FRT	296	€24,346
22	8984890171	PUMP ASM; FUEL,SUPPLY	37	€24,091
23	7551912190	SENSOR; SHORT RANGE RADAR	90	€21,688
24	8977998740	STEERING UNIT	9	€20,975

25	8972763920	CONTROL UNIT	30	€20,775

Pattern. Aftertreatment dominates by count (NOx sensors, DEF tanks, urea injectors, PM sensors). Steering units dominate by value. Engine replacements are rare but high-cost.

4. Top 15 failure modes — LCV (D-Max)

Blank operation descriptions in the source data are labelled with the underlying operation code (typically W-prefix or X-prefix codes — likely warranty admin / recall / goodwill operations).

#	Operation / Code	Cases	Total value €
1	GEAR ASSEMBLY, POWER STEERING - REPLACE	295	€561,920
2	[Code X9875 — description not provided]	875	€211,566
3	[Code X9836 — description not provided]	933	€119,179
4	SENSOR, PM - REPLACE	472	€114,556
5	[Code X9876 — description not provided]	351	€85,110
6	CONTROL UNIT, EMERGENCY CALL - REPLACE	118	€80,333
7	RECEIVER, RADIO AND CD - REPLACE	134	€58,021
8	ENGINE ASSEMBLY - REPLACE RZ4E	4	€57,532
9	TANK, UREA FLUID - REPLACE	51	€53,505
10	TURBOCHARGER ASSEMBLY - REPLACE RZ4E	69	€44,331
11	ELECTRIC PUMP, COOLANT, WATER-COOLED INTERCOO	251	€42,409
12	SUB RADIATOR ASSEMBLY - REPLACE	194	€34,601
13	PUMP, FUEL INJECTION DIESEL - REPLACE RZ4E	57	€27,396
14	DOSING MODULE ASSEMBLY - REPLACE	171	€25,691
15	[Code X9859 — description not provided]	13	€20,012

Top 15 failure modes — CV (N-series + F-Series)

#	Operation / Code	Cases	Total value €
1	DIESEL PARTICULATE DEFUSER FILTER - R&R	129	€113,270
2	PUMP, UREA FLUID - REPLACE	78	€83,103
3	SENSOR, UREA - REPLACE	203	€70,874
4	SENSOR, NOX, EXHAUST - REPLACE (IN)	225	€64,190
5	SENSOR, NOX, EXHAUST - REPLACE (OUT)	210	€55,580
6	ENGINE ASSEMBLY - REPLACE RZ4E	3	€28,166

7	METER BOARD ASSEMBLY - REPLACE	48	€26,299
8	SENSOR, PM - REPLACE	85	€25,357
9	[Code E3840 — description not provided]	28	€16,763
10	CARRIER ASSEMBLY, REAR AXLE - R&R OR REPLACE	13	€16,085
11	GENERATOR ASSEMBLY - REPLACE DIESEL	25	€16,045
12	COOLER, EGR VALVE - REPLACE	25	€8,726
13	CONTROLLER, ECM (ENGINE CONTROL MODULE) - R&R	8	€8,150
14	TRANSMISSION ASSEMBLY - REPLACE MZX, MZW	1	€7,593
15	DIESEL PARTICULATE DEFUSER ASSY - R&R OR REPL	7	€7,251

LCV pattern. Power steering gear assembly = €562k (one operation type, 295 cases). Two large blocks of code-only operations (X9836 / X9875 / X9876) account for €474k combined — likely a single recall campaign worth investigating.

CV pattern. DPF / urea pump / NOx sensors dominate at ~€390k combined. W1102 / W1097 (code-only entries, 8,849 cases) are likely warranty-administration or campaign operations — worth retrieving the operation-code dictionary from IML to label them properly.

5. Warranty cost benchmarking — what the right comparison is

Comparing warranty *period and mileage offers* across OEMs (as in the earlier draft) does not tell us anything operationally useful. What matters is **warranty cost as a percentage of revenue** — the metric every listed OEM discloses in its annual report. This section lays out the proper comparison framework and is honest about where ISZE numbers can vs. cannot be directly compared.

5.1 ISZE position — what we have computed

Metric	Value	Basis
Network warranty value at PR00 (2025)	€2,894,644	Parts only, ex labour / sublet / towing
Network commercial parts sales (2025)	€31,353,932	ISZE → distributor net sales, parts-only
Warranty / commercial parts sales	9.2%	Our calculation
Range across DBs	3.0% – 20.3%	Isuzu Ireland low; RSA Norway high

Denominator problem. 9.2% is on a *parts-only* basis. Industry warranty-cost benchmarks are reported on a *total revenue* basis (vehicles + parts + service). The two are not directly comparable.

5.2 The standard industry metric and what it requires

Every publicly listed OEM discloses warranty accruals in its annual report (SEC 10-K for US-listed; equivalent in JP/EU filings). The standard metric is:

Warranty cost ratio = total warranty expense ÷ total revenue

Total warranty expense includes parts + labour + sublet + towing + administrative. Total revenue is the entire company's annual sales (vehicles + parts + service combined).

To compute the same metric for ISZE we need: (a) total ISZE warranty cost — parts at PR00 plus labour and other admit amounts from the warranty file, and (b) total ISZE consolidated revenue (vehicles + parts + service) for FY2025. Item (a) is in the warranty file but not yet aggregated; item (b) needs to come from internal ISZE P&L.;

5.3 Industry warranty cost ranges — public sources only

The values below are **industry ranges** from *Warranty Week*'s annual Top 100 Warranty Providers report, which aggregates 10-K disclosures. They are **not** Isuzu-specific competitor numbers — they describe segment-level industry behaviour. For specific OEM figures, the latest annual report of each company should be consulted directly.

Segment	Warranty cost as % of revenue	Source
Light vehicle / passenger OEMs (industry avg)	1.5 – 2.5%	Warranty Week — 10-K aggregation
Premium / Japanese passenger OEMs (Toyota, Honda)	below 1.5% typically	Warranty Week — historical bands
Heavy-duty truck OEMs (industry avg)	2.5 – 4.0%	Warranty Week — 10-K aggregation
Medium-duty / commercial vehicle OEMs	2.0 – 3.5%	Warranty Week — 10-K aggregation
New-entrant / quality outliers	5% or above	Warranty Week — historical outliers

These ranges are based on aggregated 10-K filings. Listed OEMs in ISZE's competitive set whose annual reports could be sourced for verified single-OEM data: **Toyota Motor Corp** (Hilux), **Ford Motor Company** (Ranger / Transit / F-series consolidated), **Daimler Truck Holding AG** (Atego, Sprinter via Mercedes-Benz Group), **PACCAR Inc** (DAF), **Iveco Group N.V.** (Daily, Eurocargo), **Traton SE** (MAN TGE / TGL, Scania), **Volvo Group** (Volvo FL, Renault Trucks Master / D), **Stellantis N.V.** (Fiat Professional, Ram), **Mitsubishi Fuso** (Canter — within Daimler Truck), **Hyundai Motor** (Mighty). Each publishes warranty

accrual either as a separate disclosure line or within the cost-of-sales note.

5.4 Recommended next step to close the comparison

Step 1. Compute total ISZE warranty cost: parts at PR00 (this file) + labour amounts (LBRAMT in CV file, LaborAdmitAmt in LCV file) + sublet + towing. Total likely 1.5–2× the parts-only €2.89M.

Step 2. Obtain ISZE consolidated FY2025 revenue from internal P&L; (vehicles + parts + service).

Step 3. Compute the ratio. Compare to verified competitor disclosures from the 2024 annual reports of the OEMs listed in section 5.3.

Step 4. Engage IML if the ratio places ISZE in the upper quartile of the industry range, or if a specific DB sits substantially above the network average.

6. Cross-sell — warranty parts also moving commercially

For each top warranty part, commercial sales of the same PN in 2025. High warranty + high commercial = BVP/competitive battleground SKUs. High warranty + zero commercial = OE-locked.

#	Part number	Description	Warr qty	Warr €	Sales qty	Sales €	Warr/total
1	7552348290	STEERING UNIT	186	€369,000	361	€718,864	33.9%
2	8978808250	SENSOR; PM	1,270	€307,073	2,905	€688,450	30.8%
3	7552348280	STEERING UNIT	72	€142,839	134	€259,369	35.5%
4	8982878080	FILTER ASM	97	€109,578	270	€276,848	28.4%
5	8983528481	SENSOR; NOX	387	€99,978	2,340	€557,039	15.2%
6	8978808270	SENSOR; PM	412	€99,617	2,177	€517,590	16.1%
7	8983767550	ROTOR; DISC BRK,FRT	1,073	€85,046	8,357	€641,264	11.7%
8	8975293220	ENGINE ASM	4	€57,532	2	€28,392	67.0%
9	8972746690	TANK ASM; DEF	49	€53,146	107	€116,501	31.3%
10	7552752270	CONTROL UNIT	71	€49,167	221	€151,462	24.5%
11	8974985741	TURBOCHARGER ASM	52	€43,385	197	€148,135	22.7%
12	8984865441	PUMP; WATER	241	€42,226	909	€153,563	21.6%
13	8975077751	PUMP ASM; DEF,DCM SPLY	38	€40,831	112	€119,490	25.5%
14	8982688122	PUMP ASM; DEF,DCM SPLY	37	€39,757	171	€178,723	18.2%
15	8974807975	RADIO CONTROL ASM; STEREO,AM-F	77	€33,671	91	€44,125	43.3%
16	8984865960	RADIATOR ASM	181	€33,223	934	€164,094	16.8%
17	8983373180	SENSOR ASM; DEF TANK	97	€31,845	303	€86,102	27.0%
18	8976710960	ENGINE ASM	2	€28,164	1	€10,497	72.8%
19	8975452010	SENSOR ASM; DEF TANK	69	€26,120	45	€14,897	63.7%
20	8983842670	INJECTOR ASM; DEF DCM	158	€25,005	611	€95,399	20.8%

Reading. Steering Unit: €369k warranty + €719k commercial → 34% warranty-driven. PM Sensor 31%. Brake Rotor 12% (healthier). Two pure-warranty SKUs at bottom — OE-locked.

7. PMS-recoverable parts

Parts matching typical PMS scope (filters, brake pads/rotors, water pumps, radiators, etc.). Network warranty 2025 on PMS-eligible items: **€374,337** (~13% of total warranty value). Higher PMS capture rate → these parts replaced commercially before failure → warranty cost down, parts revenue up.

#	Part number	Description	Qty replaced	Warranty €
1	8982878080	FILTER ASM	97	€109,578
2	8983767550	ROTOR; DISC BRK,FRT	1,073	€85,046
3	8984865441	PUMP; WATER	241	€42,226
4	8984865960	RADIATOR ASM	181	€33,223
5	8975056801	PAD KIT; CALIPER,DISC BRK,FRT	296	€24,346
6	7552026060	FILTER ASM; VCV	312	€15,619
7	8982049420	FILTER ASM	11	€12,672
8	8983767530	ROTOR; DISC BRK,FRT	104	€8,243
9	8982050610	FILTER ASM	7	€5,910
10	8978279610	PAD KIT; DISC BRK,W/O SHIM & CLIP	48	€3,290
11	8984865440	PUMP; WATER	17	€2,979
12	8975074440	FILTER ASM	2	€2,804
13	8975214890	PAD KIT; CALIPER,DISC BRK,FRT	32	€2,632
14	8975534311	RADIATOR ASM	5	€1,585
15	8974715805	BELT; SEAT,RR OUTER	8	€1,335

Every percentage point of PMS capture moves cost from warranty (€0 revenue to ISZE) to commercial (full margin).

8. Monthly trend 2025

Month	Claims (lines)	Warranty €
2025-01	1,024	€293,175
2025-02	1,039	€299,717
2025-03	1,247	€341,583
2025-04	976	€250,377
2025-05	1,039	€272,116
2025-06	1,000	€251,867
2025-07	989	€226,453
2025-08	1,012	€244,672
2025-09	1,089	€242,376
2025-10	1,002	€232,099
2025-11	948	€240,207
TOTAL 2025	**11,365**	**€2,894,644**

Claim recognition timing — when billed/assessed, not when the failure happened. Spikes may indicate dealer claim cycles or quarterly assessment batches.

9. Most expensive single warranty claims

CV top 10 by single document number

#	Document #	Lines on claim	Total value €
1	1071.0	59	€22,575
2	7474.0	33	€20,139
3	1063.0	36	€19,270
4	7506.0	28	€18,801
5	1051.0	35	€17,189
6	1083.0	46	€17,086
7	1080.0	41	€15,908
8	1082.0	45	€15,749
9	1061.0	46	€13,999
10	7514.0	37	€13,168

LCV top 10 by single document number

#	Document #	Lines on claim	Total value €
1	938911408.0	16	€16,237
2	900000610.0	45	€15,302
3	938911446.0	1	€14,383
4	938911456.0	1	€14,383
5	938911364.0	1	€14,383
6	900000603.0	53	€12,081
7	900000604.0	46	€11,916
8	938911533.0	27	€11,892
9	27430.0	41	€11,459
10	27499.0	17	€11,252

Concentration of high-value claims at a single dealer can flag workshop-quality issues. Worth inspecting top 3-5 in each list for root cause.

10. Key findings & recommendations

Power steering on D-Max. €562k from a single operation (gear-assembly replace). Three steering-unit part numbers combine for €533k = 18% of all warranty. Quality flag for IML.

Aftertreatment fragility. DEF tank, DEF pump, urea injector, NOx sensors (in/out), urea sensor, PM sensors combined ≈ €800k. Most common failure source across CV and LCV. Limited mitigation (regulatory hardware) but PMS protocols should include early-warning checks.

Electrical failures dominate LCV. 3,373 cases worth €824k (38% of all LCV warranty value) categorised 'ELECTRICAL FAILURES'. Above industry norm of 25-35%. D-Max electrical reliability worth raising with IML.

Warranty intensity outliers. RSA Norway 20.3%, IUK 17.0%, Finland 17.1% — top of network. Isuzu Ireland 3.0% — bottom. Range too wide for fleet-mix alone; investigate under-reporting at the low end and fleet condition at the high end.

Code-only operation entries. Largest by case count: CV codes W1102 (5,775 cases) and W1097 (3,074); LCV codes X9836 (1,855), X9875 (1,420), X9876 (685). These are likely recall / warranty-admin / goodwill campaigns. Retrieve operation-code dictionary from IML to label them properly — the X-block LCV codes alone account for €474k.

UMI Israel LCV data gap. Universal Motors Israel has €3.4M of 2025 commercial parts sales but zero rows in this warranty extract. Confirm with IML whether Israel processes warranty outside this system or the file is incomplete.

Failure peak 20-50k km / years 2-3. Bulk of failures during the post-shakedown, pre-replacement window. Pre-3-month infant mortality only 1% — quality at delivery is fine. >3-year claims already account for 40% — fleet aging into post-warranty zone.

PMS recoverability ≈ €374,337. Parts matching typical PMS scope account for ~28% of warranty cost. Each percentage point of PMS capture lift converts warranty cost to commercial revenue at full margin.

BVP / aftermarket angle. 49% of warranty value falls on ABC-A parts — the high-volume parts facing aftermarket competition. Cross-sell table identifies the SKUs where competitive positioning matters most: PM sensors, NOx sensors, brake rotors, water pumps, radiators.

Benchmarking next step. 9.2% of parts sales is not directly comparable to industry 1.5-3% of total revenue. Compute ISZE total warranty cost (incl labour) ÷ ISZE total consolidated revenue (vehicles + parts + service) to get the apples-to-apples ratio. Then compare to verified 2024 annual report disclosures of Toyota, Ford, Daimler Truck, PACCAR, Iveco Group, Traton, Volvo Group, Stellantis.

11. Methodology

Warranty values are reconstructed by multiplying the unit quantity on each warranty claim line by the current PR00 reference price for that part number. The admit/claim amount in the warranty file is not used (warranty pricing terms vary by market). All values in EUR. Warranty parts do not appear in the commercial parts sales TSV — independent of GPS.

Sources: Raw_CV_Warranty (13,814 claim lines, 2,388 priced for 2025) and Raw_LCV_Warranty (25,717 claim lines, 8,977 priced for 2025) × PR00 price master (163,077 part numbers). 37 part numbers in LCV warranty could not be priced (likely superseded PNs). Blank operation descriptions are recovered via the operation-code column and labelled as such. Industry warranty-cost ranges (section 5.3) are from Warranty Week's Top 100 Warranty Providers report, which aggregates SEC 10-K filings. Specific competitor warranty ratios are not included here — they should be sourced from each OEM's latest annual report.
