# Maintenance Interval Implications

| Segment | Model / engine | Interval basis | Campaign implication |
|---|---|---|---|
| **N35.125** | NLR87 / RZ4E | 20,000 km | Secondary service-reminder campaign only |
| **N35.150** | NLR88 / 4JZ1 | Flexible up to 40,000 km | Secondary, where customer data is reliable |
| **N75** | NPR75 / 4HK1 | **40,000 km** | Phase 1 target - fleet, R&M and safety events |
| **N75** | NPR88 / 4JZ1 | **40,000 km** | Phase 1 target - fleet, R&M and safety events |

Do not use old NLR85 / 4JJ1 assumptions as the basis for the launch plan.

# PMS Target Customers – N75

ISUZU

## 1. Target segment

Phase 1: N75 / 7.5t fleet customers.

N35 becomes a secondary model-specific activity.

## 2. Headline items

Brake and Air Filter as they are practical, visible and easier to convert.

## 3. PMS Parts

Oil and Fuel Filters remain in the 40,000 km PMS Service Pack, but should not lead the campaign.

## 4. Exclusions

No broad Clutch campaign in phase 1.

Use only for VIN-specific manual opportunities.

N75 Fleet Uptime PMS campaign: 40,000 km PMS filter packs plus brake & Air Filter inspection conversion.

**40k**

**Maintenance Interval**

N75

**7.5t**

**Fleet Focus**

easier to locate than 3.5t

**R&M**

**Data Validation**

brake sales measurable

## Identifiable customers

Fleet, R&M, service-contract and safety-inspection records give dealers a real contact list, not just a theoretical UIO opportunity.

## Repeated workshop touchpoints

Regular safety events create the practical trigger for brake inspection, quote and conversion.

A focused N75 pilot is easier to validate, fund and measure than a broad N35/N75 activity.

# Target item selection & Promotion Approach

**Oil Filter**

pack foundation

**Fuel Filter**

pack foundation

**Brake**

Safety-Critical conversion

**Air Filter**

low cover / easy attach

Make Air Filter and Brake the headline items. Use Oil and Fuel Filters as the PMS pack foundation. Remove Clutch from broad phase 1.

1. **Identify N75 fleet events**

   Use R&M, service-contract and dealer safety-inspection schedules.

2. **Pre-check VIN / engine / mileage**

   Confirm NPR75 or NPR88 and the correct 40,000 km pack.

3. **Prepare PMS filter pack**

   Oil + Fuel + Air filters ready before the workshop visit.

4. **Inspect brakes during safety event**

   Record pad condition and convert where replacement is needed.

5. **Quote, convert or follow up**

   Capture declined work as the next PMS reminder opportunity.

Align PMS parts with the fleet safety-event cycle to protect uptime and avoid repeat workshop visits.

# PMS Target Customers – N35

### NLR87 / RZ4E

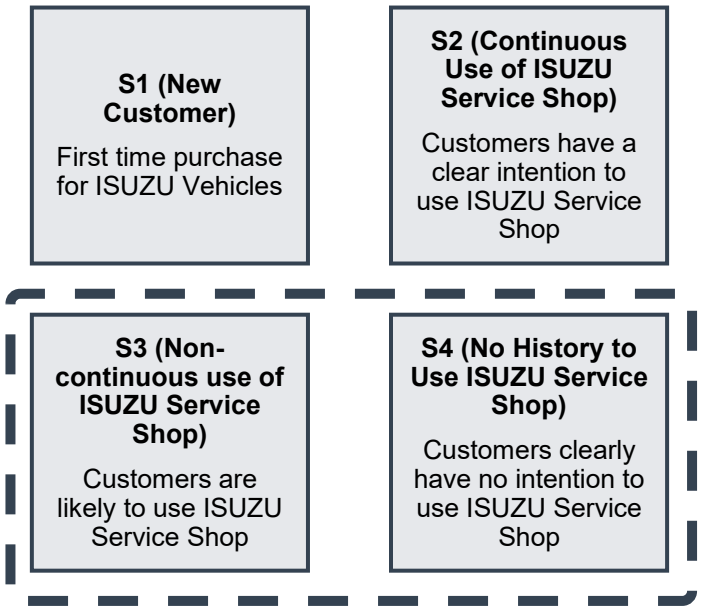

N35.125 - 20,000 km basis. Use service reminders only where customer contact and mileage data are reliable.

### NLR88 / 4JZ1

N35.150 - flexible interval up to 40,000 km. Use PMS pack offers for identifiable customers.

### NLR85 / 4JJ1

Previous N35.120 model. Do not use as the calculation basis for the main launch campaign.

### N35 message

"Do the full PMS filter set, not just the oil filter."

# PMS Parts Promotion – N75

| Totals | | | | | | | | | | | | | | |

# Recommended Incentive Structure

**Pay only on incremental sales above baseline**

Each dealer should have a baseline calculated from their average monthly sales of the selected part numbers over the previous 6 or 12 months. The incentive is then paid only on sales **above that baseline**.
Example:

| Dealer | Normal 3-month baseline | Campaign actual | Incremental units paid |
|---|---|---|---|
| Dealer A | 120 target PMS parts | 155 | 35 |
| Dealer B | 80 target PMS parts | 84 | 4 |
| Dealer C | 200 target PMS parts | 198 | 0 |

**Add a dealer target bonus on top**

| Achievement vs dealer target | Bonus |
|---|---|
| **100% of target** | £250 dealer parts credit |
| **125% of target** | £500 dealer parts credit |
| **150% of target** | £750 dealer parts credit |
| **Best N75 brake conversion dealer** | Additional £500 credit or workshop equipment voucher |
| **Best air-filter attachment rate** | Additional £500 credit or recognition award |

# 2030 Growth Target Incentive

## Where the opportunity sits

Isuzu's IX 2030 plan targets ¥6tn sales and a transformation to a solutions company. In the UK, the corresponding lever is converting our parc (UIO) into incremental parts revenue.

The 2026 plan moves ITUK parts sales from £12.87m (2025) to £13.13m, a 77% share of UIO opportunity. The stretch idea pushes that share to 80% by adding £508,758 of incremental parts sales.

Half of the gross profit on that stretch, £62,052 is offered back by ISZE as a kickback we can deploy as a dealer incentive.

**£12.87m**

ITUK parts sales — 2025 actual baseline

**£13.13m**

2026 plan (77% of UIO opportunity)

**£13.64m**

2026 stretch (80% of UIO opportunity)

# 2030 Growth Target Incentive Trip

ISUZU

**2026 Plan**

**£13,129,200**

Baseline target

**Stretch**

**+£508,758**

Incremental parts sales

**Stretch TTL**

**£13,637,958**

80% UIO share

**ISZE GP share**

**£124,104**

Gross profit on stretch

**ITUK kickback**

**£62,052**

½ of ISZE GP - our pot

**£62,052**

## The incentive pot we control

Released only when the UK dealer network collectively delivers the £508,758 parts stretch. No stretch, no kickback and no trip.
